Programming Languages:
Java – intermediate
C++ – basics
TS / JS – basics

Skills
Java Core, Collections, JDBC, JUnit, TestNG, Maven, Gradle, JPA, Docker, Jenkins
Jira, Confluence, YouTrack, TestRail, DevTools, Swagger
JMeter with Grafana, Selenium, Rest Assured, Allure, Postman, Newman
MySQL, SQL Server, SQLite, PostgreSQL, MongoDB, Redis
Algorithms and data structures, test design techniques, OOP, SOLID, Design Patterns, REST, SOAP, GraphQL, gRPC
HTML, CSS
GitHub, Bitbucket

Languages:
English: B1
Russian: native

Work experience:

June 2024 – now: SoftClub - QA Engineer

SC-EDI
Jira, Confluence, Postman, SoapUI, Android Logcat, SQL, TestRail/TestIT, DevTools, REST, SOAP, JMeter

Responsibilities:
- Conduct smoke, regression, and integration testing
- Perform new feature testing
- Collaborate with development team to ensure quality, logging bugs in Jira
- Development of integration tests in Postman
- Writing test documentation in TestRail
- Performance testing with JMeter, collected metrics in Grafana in conjunction with InfluxDB, deployed in Docker, preparing a summary report for the client
- Testing a mobile application for Android

Summary
At this point, I am considering proposals in the area of automated testing in Java. I have a good knowledge of Java, test framework architecture and development best practices. Willing to put my best efforts to become a great AQA engineer. Friendly, do sports, easy to find common language with people.
